## **SC-401**

Single Intercom Channel Wall Phone  
Simultaneous Paging,  
Internal Speaker with Transformer

### **STORECOM INTRODUCES IT'S NEW PK 200WA REPLACEMENT INTERCOM WITH SPEAKER**

This Sleek wall mount phone is in a new "Water and Dust Resistant" body. As in all of our phones the SC-401 provides a single intercom channel for efficient operations - Simultaneous paging allows paging even when the intercom channels are in use with no interruption - A 4 Watt Internal Speaker provides complete communications - no need for overhead speakers - the Magnetic Hook Switch eliminates all of the moving parts in our cradle. This switch provides an efficient, noise free hang up. You will no longer hear that annoying rattle and click of our old system. Just smooth, silent hangups. All cables exit the bottom of the unit with Heyco strain reliefs for Dust and Water resistance. All internal components are locked away from the harsh environments that cause failure in most electronics. Our handset components are also sealed for "Water and Dust Resistance". Virtually indestructible... Possibly the last Intercom you will ever need to buy!
