

# 300BPA

Page Adapter / Power Supply

This workhorse page adapter/power supply unit provides two separate and well filtered intercom channels for efficient operations. Simultaneous Paging provides overhead paging while the talk path is busy without interruption. This unit provides Busy Light Control and Background Music Interrupt during paging with a soft fade out and in. Separate volume controls are provided for both Music and Page. Other features include - Greater dynamic range on paging. Improved audio quality. Our new PTC circuit eliminates burn outs. If the lines are shorted somewhere our PTC circuit will shut down the power supply only until the short is cleared. Once your short is cleared, your page adapter/power supply comes back to life. No more smelly resistors and charred transformers. We have also added an external power transformer for UL acceptance.

## FEATURES
