

Wire Size VS. Line Length For 8 Ohm Speakers

Commonly Accepted industry practice regarding conductor size versus line length for speaker/horns wired at 8 Ohms (voice coil) impedance.

	Line Length (in Feet)
#10	240
#12	150
#14	90
#16	50
#18	30
#20	24
#22	15

Conductor Size
(AWG#)
